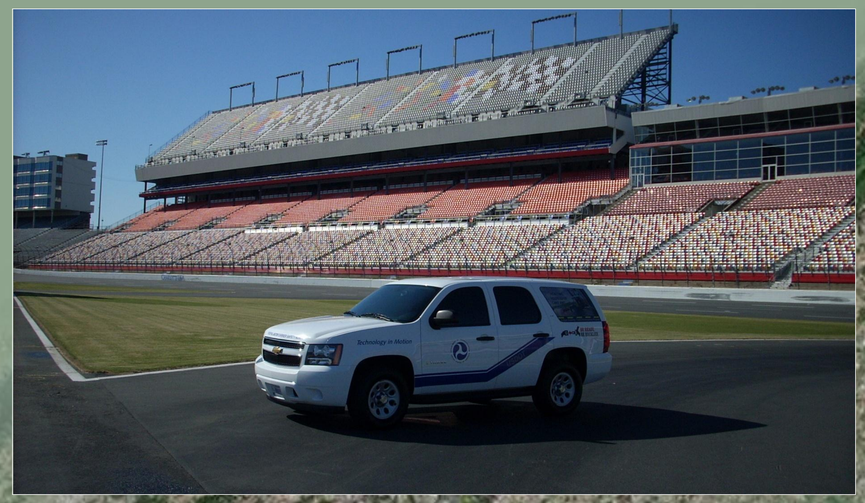
Technology in Motion Vehicle (TMV)

Goal

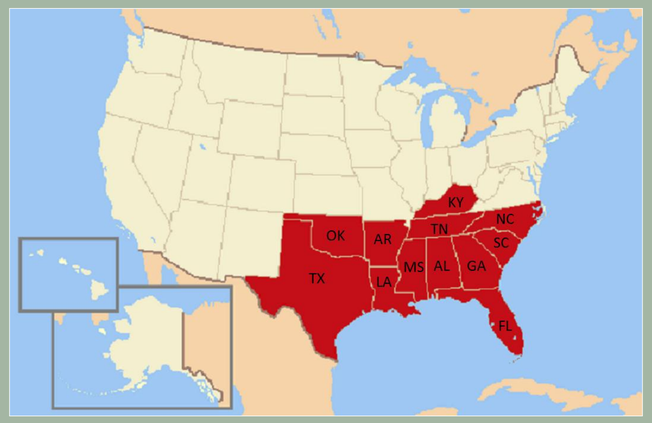
To promote truck and bus safety programs and technologies with the goal of increasing end-user acceptance, adoption, and use.

Objectives

- Communicate key FMCSA safety messages at multiple venues
- Demonstrate proven and emerging safety technologies to state and motor carrier stakeholders
- Promote deployment of safety technologies by fleets and state MCSAP agencies
- Evaluate program's safety impact annually



Supported States



Benefits

- Unique, cost-effective outreach platform
- Multi-faceted messages
  - TACT
  - Be Ready, Be Buckled
  - Technology in Motion
- Multiple Venues
  - National state and trucking association meetings
  - National bus association meetings
  - Motor Carriers' driver safety meetings
- Allows for "hands on" demonstration of safety technologies
- No cost for use of technologies
- Potential to conduct inexpensive evaluations of technologies with FMCSA field staff
